## **Cotton Varieties Planted, United States 2008 Crop**

The Deltapine brand of Upland cottonseed was the most popular planted in the United States for the 2008-2009 season, according to the USDA, Agricultural Marketing Service's Cotton Program. The Bayer CropScience Fibermax brand was the second most popular followed by Bayer CropScience Stoneville, Phytogen, Americot, All-Tex, and Dyna-Grow.

Transgenic varieties - genetically engineered varieties resistant to worms, herbicides, or both - accounted for about 94.6 percent of the Upland cotton planted in the United States in 2008. Usage of transgenic varieties in 2008 varied from a high of 100 percent in Arkansas, Mississippi, Missouri, and Tennessee to a low of 71.3 percent in California. Other states planted from 95-99 percent transgenic except for Texas (89.9 percent).

Deltapine brand varieties were the most popular planted in 2008, accounting for about 41.5 percent of the United States acreage. This brand accounted for 75.8 percent of the acreage planted in the southeastern states (Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia). It accounted for 53.3 percent of the acreage planted in the south central states (Arkansas, Louisiana, Mississippi, Missouri, and Tennessee), 17.0 percent in the southwestern states (Texas, Oklahoma, and Kansas), and 47.5 percent of the acreage planted in the western states (Arizona, California, and New Mexico). Deltapine's most popular varieties were DP 555 BG/RR, DP 444 BG/RR, DP 164 B2RF, and DP 445 BG/RR, accounting respectively for 17.2, 5.9, 4.7, and 3.9 percent of the U.S. Upland cotton acreage.

Bayer CropScience Fibermax brand varieties were the second most popular planted in 2008, accounting for about 32.1 percent of the United States acreage. These varieties accounted for 1.9 percent of the acreage planted in the southeastern states, about 1 percent in the south central states, 65.9 percent in the southwestern states, and 14.11 percent in the western states. The most popular Bayer CropScience Fibermax varieties were FM 9068 F, FM 9603 B2F, FM 9180 B2F, and FM 958, accounting respectively for about 7.1, 7.0, 2.9, and 2.6 percent of the United States acreage planted to Upland cotton.

Bayer CropScience Stoneville brand varieties were the third most popular planted in 2008. These varieties accounted for about 14.2 percent of the acreage planted. They accounted for 12.0 percent of the acreage planted in the southeastern states, 38.7 percent of the acreage in the south central states, 2.6 percent in the southwestern states, and 8.0 percent in the western states. The most popular Stoneville varieties were ST 4554 B2RF, ST 4427 B2RF, and ST 5242 BR accounting respectively for about 7.9, 1.4, and 1.4 percent of the United States acreage planted to Upland cotton.

Phylogen brand varieties were the fourth most popular planted in 2008, accounting for about 4.1 percent of the United States acreage. They accounted for 7.4 percent of the acreage planted in the southeastern states, 4.2 percent of the acreage in the south central states, less than 1 percent in the southwestern states and 27.8 percent in the western states. The most popular Phylogen brand varieties were PHY 485 WRF and PHY 370 WR WRF, accounting respectively for about 1.4 and 0.7 percent of the United States acreage planted to Upland cotton.

Americot brand varieties were the next most popular and accounted for about 2.7 percent of the U.S. acreage planted in 2008. All-Tex brand varieties were the next most popular and accounted for about 1.8 percent of the U.S. acreage planted in 2008. Dyna-Gro varieties were the seventh most popular and accounted for about 1.5 percent of the 2008 cotton acreage.

Phylogen was the most popular brand of American Pima varieties planted in 2008. Phylogen variety PHY 800 Pima accounted for 66.9 percent of the United States Pima acreage and was the most popular variety planted in California (73.9 percent of California Pima acreage). Deltapine's DP 340 Pima was the second most planted American Pima variety and accounted for 22.9 percent of the U.S. crop. Deltapine's DP 744 Pima was the next most popular variety and accounted for 7.4 percent of the U.S. Pima acreage.

Estimates of the percentage of the various varieties of cotton planted in the United States for 2008 were based on informal surveys made by the Cotton Program Classing Offices. Those surveyed included ginners, seed dealers, extension agents, and other knowledgeable sources.
